BAYU SAPUTRO
bayu.saputro@example.com
Bandung

TECHNICAL SKILLS
Python, FastAPI, Flask
MySQL, PostgreSQL
Docker, Kubernetes
Google Cloud (GKE, Cloud SQL)
GitLab CI/CD
pytest, Locust

EDUCATION
BSc Informatics
Institut Teknologi Bandung, 2018

CERTIFICATIONS
Google Cloud Associate Cloud Engineer

SUMMARY
Backend engineer with 6 years of professional Python experience building payment and order services.

WORK EXPERIENCE
Lead Backend Engineer - BayarIn (2023 - present)
Designed and built REST APIs in FastAPI for a payment gateway handling 500k transactions per day. Owned the MySQL schema and query tuning. Packaged services with Docker and ran them on Google Kubernetes Engine. Set up GitLab CI/CD pipelines that lint, test and deploy on every merge.

Backend Engineer - Pasar Digital (2020 - 2023)
Built Flask REST services for order management backed by PostgreSQL. Wrote pytest unit and integration suites and load tests with Locust.

Junior Software Engineer - Solusi Data (2018 - 2020)
Maintained internal Python tools and reporting jobs.
