SUMMARY
Go backend engineer with 4 years of experience building high-throughput services.

EXPERIENCE
Backend Engineer (Go) - OjekKilat (2022 - present)
- Designed and built REST APIs in Go for driver matching and trip pricing.
- Used MySQL for trip data and Redis for driver locations.
- Deployed Docker containers to Google Cloud Run on GCP.
- Built GitHub Actions workflows for build, test and deploy.
- Wrote table-driven unit tests with Go's testing package.

Software Engineer - Startup Hub (2021 - 2022)
- Built Go microservices and occasional Bash scripts for data cleanup.

EDUCATION
BSc Computer Science - Universitas Padjadjaran, 2021

SKILLS
Go, MySQL, Redis, Docker, GCP (Cloud Run, Pub/Sub), GitHub Actions
